Skills

JavaScript, React, Redux, Ruby, Rails, jQuery, PostgreSQL, Heroku, Webpack, git, HTML5, CSS3, Python, MATLAB

Projects

Kanbanno

[Live Site](#) | [GitHub](#)

JavaScript, React, Redux, jQuery, Rails, PostgreSQL, HTML5, CSS3, Webpack, Heroku

Full-stack app inspired by Trello for collaborative project management with the kanban system

- Managed CRUD by creating a RESTful API to link custom transactional database operations with Active Record and PostgreSQL to give users full control over their content
- Implemented front end and back end user authentication with BCrypt, cookies, and custom React-Router components to protect user-generated data and persist logins across sessions
- Normalized database and front-end state to reduce data redundancy and enable predictable, simplified state management with Redux
- Integrated React components from the react-beautiful-dnd library to provide drag-and-drop capability and give users an intuitive interface to organize tasks

Elemental Attack

[Live Site](#) | [GitHub](#)

JavaScript, HTML5, Canvas API, CSS3, Webpack

Educational action game based on concepts from high school chemistry

- Utilized HTML5 Canvas and animation frames to provide smooth gameplay and conserve computing resources when players are not engaged with the game
- Developed object collision logic to manage simultaneous collisions involving atoms and the player
- Employed good OOP practices and separation of concerns to split game components into separate entities in order to create a DRY maintainable codebase

Experience

Sales Associate | May 2019 - August 2019

UNIQLO USA | New York, NY

- Promoted store app to achieve 40% usage at checkout from our store, higher than the national average
- Practiced good inventory management to maintain 0% out-of-stock ratio, ensuring full product availability
- Processed transactions within 120 seconds to reduce queues at checkout, boosting customer satisfaction

Vice President | September 2017 - May 2018

American Institute of Chemical Engineers (AIChE) | University at Buffalo Student Chapter

- Planned fundraisers to raise \$4000 for activities that support members' professional development
- Introduced new email format and club calendar to improve communication to the club's 70+ members
- Received the AIChE Western NY Local Section Outstanding Senior Award for contributions to the club

Education

App Academy | August - November 2019 | New York, NY

Immersive 1000-hour full-stack web and software development course with an acceptance rate of less than 3%

University at Buffalo, The State University of New York | May 2018 | Buffalo, NY

Bachelor of Science in Chemical Engineering, Minor in Mathematics, GPA: 3.9/4.0
